ABOUT ME

Full-Stack Developer skilled in React.js, Node.js, Express.js, and REST API design, with production experience building CRM modules end-to-end and shipping a live Flutter app on the Play Store. Recently built a RAG-based AI agent with multi-step intent detection and end-to-end workflow automation for a global market research firm. Strong foundation in Java and data structures; completed MCA (2024-2026).
